

A / EDUCATION

University of Queensland

B. Adv. Business (Hons)
Finance + Business Analytics double major
Feb 2023 - Dec 2027 (penultimate year)
GPA 5.5/7 · ATAR 90.4

KEY COURSES

Corporate Finance	FINM2415
Asset Pricing	FINM2416
Derivatives & Risk Management	FINM3405
Financial Management	FINM2412
Business Analytics Project	BSAN4204
Machine Learning for Business	BSAN2205
Data Visualisation	BSAN3204
Methods of Business Analytics	BSAN2204
Prescriptive Analytics	BSAN3209
Intl Financial Mgmt (curr.)	FINM3403
Deep Learning for Business (curr.)	BSAN3212

B / SKILLS

FINANCIAL ANALYSIS

Excel modelling · scenario + sensitivity analysis · DCF valuation · derivatives pricing · financial statement analysis · pivot tables

DATA & ANALYTICS

Python · R · SQL · pandas · dashboards · visualisation

SOFTWARE ENGINEERING

TypeScript · SvelteKit · Cloudflare Workers · LLM pipelines

C / ADDITIONAL

LANGUAGES

English (native) · Japanese (JLPT N4)

VOLUNTEERING

Weekly BBQ for people experiencing homelessness, St Joseph's Gregory Terrace outreach (2020-2022).

01 / SUMMARY

Penultimate-year **UQ Finance + Business Analytics (Honours)** student trained in corporate finance, asset pricing, and derivatives. Builds financial models in Excel, runs data analysis in Python and SQL, and keeps two analytics projects live: a transit cost-benefit platform and an S&P 500 backtesting experiment. Founder of Tek Monkeys, a Brisbane consultancy with one medical-practice client, so already used to scoping, delivering, and supporting work for a paying client.

02 / EXPERIENCE

Founder & Consultant at Tek Monkeys

2024 - present

Brisbane IT consultancy · paediatric orthopaedic practice · Brisbane, QLD

- Scoped and delivered Itemate, the practice's MBS billing validator, after workflow interviews with both surgeons; now run as a managed service.
- Sole technical and commercial contact for the practice: requirements, delivery, and support, all handled under the Privacy Act 1988 (APPs) and the My Health Records Act 2012.

Customer Service at Brisbane Airport

2023 - Feb 2026

Emirates Leisure Retail + partner venues · four F&B venues across both terminals

- Three years of high-volume customer service while studying full time, with regular exposure to difficult situations that had to be resolved on the spot; progressed from counter service to specialty coffee at an award-winning roaster's flagship.

03 / ANALYTICAL PROJECTS

Monkey vs Machine S&P 500 backtesting experiment

2026 - present

mvm-dashboard.pages.dev · public dashboard, updated daily

backtesting scikit-learn Python SPY benchmark

- Backtested a gradient-boosting trader against 100,000 random portfolios and SPY buy-and-hold on five years of S&P 500 prices, with weekly rebalancing, 5 bps transaction costs, and features chosen to avoid lookahead bias.
- Now runs as a live experiment: a scheduled daily pipeline advances the race and publishes model performance against random portfolios to a public dashboard.

GoCard Insights transport cost-benefit analytics

Feb 2026

gocard.nickwfraser.dev

cost modelling sensitivity analysis SQL TypeScript

- Built a live mode-choice cost model from Go Card trip history that compares public transport with driving costs after Translink's 50¢ flat-fare reform (BSAN4204 research project).
- Wrote a daily fuel-price pipeline against the QLD FPQ API; the cost engine matches manual spreadsheet workings to within \$0.50 per week across 24 unit tests.

Itemate MBS billing validation

2026 - present

itemate.nickwfraser.dev · in production for a two-surgeon practice

process automation compliance Claude API 97 unit tests + CI

- Automated billing validation against the 6,039-item Medicare Benefits Schedule, pairing an LLM normalisation step with a deterministic matcher. This cut manual checking and lowered billing-error risk for the practice.

04 / INVOLVEMENT

UQ Economics Society + BANA

2023 - present

- Member of UQES, one of UQ's largest finance and economics societies, and of the Business Analytics Network Association: networking events, speaker panels, and industry sessions on how firms use data in commercial decisions.
